- Using Person as a part of Personnel is not right
  - Personnel is a set of workers, not of persons, generically
  - the convention used for the integer values of workerType is not clear
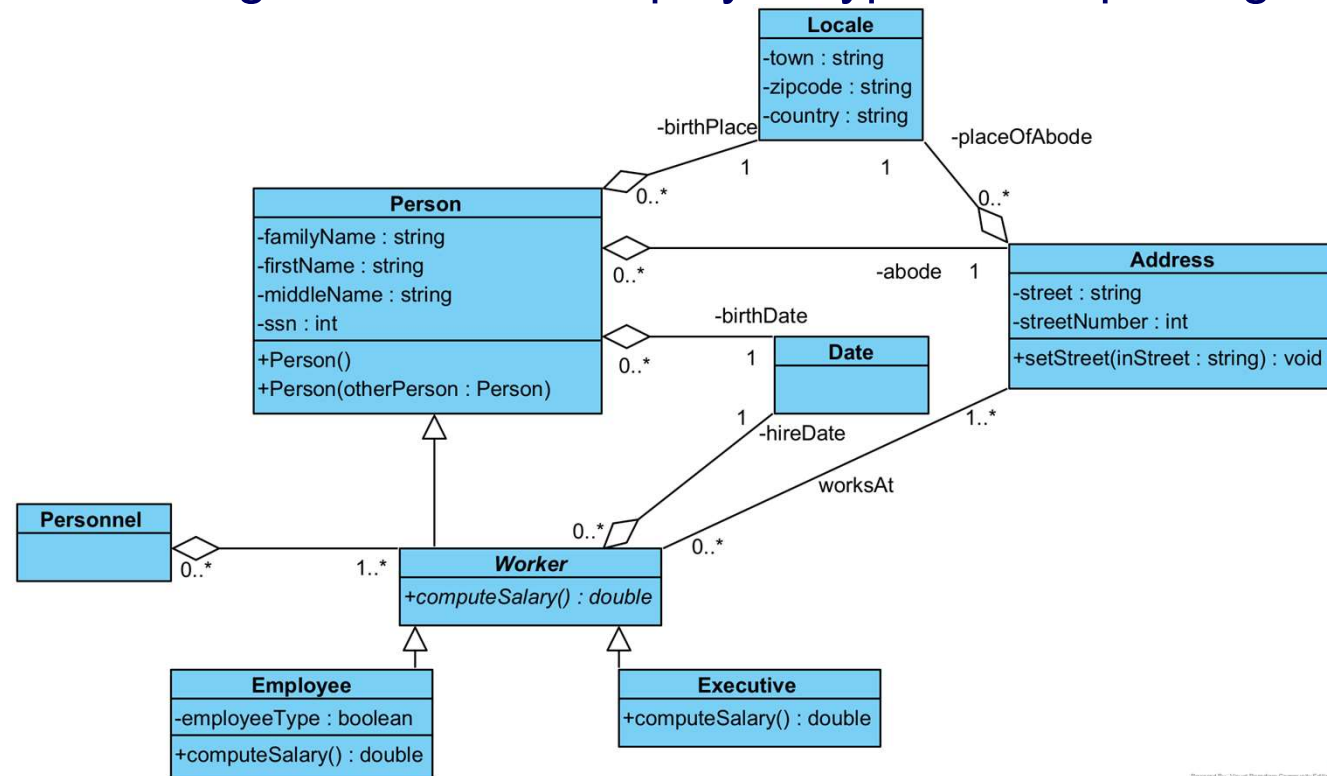

- Using Worker even with a WorkerType is not right anyway
 - use inheritance instead

- There are two different kinds of workers
  - but there also are two types of Employee
    - using the boolean employeeType is not quite right

- There are two different kinds of Employee

- Salary and ContractualLevel may be complex attributes
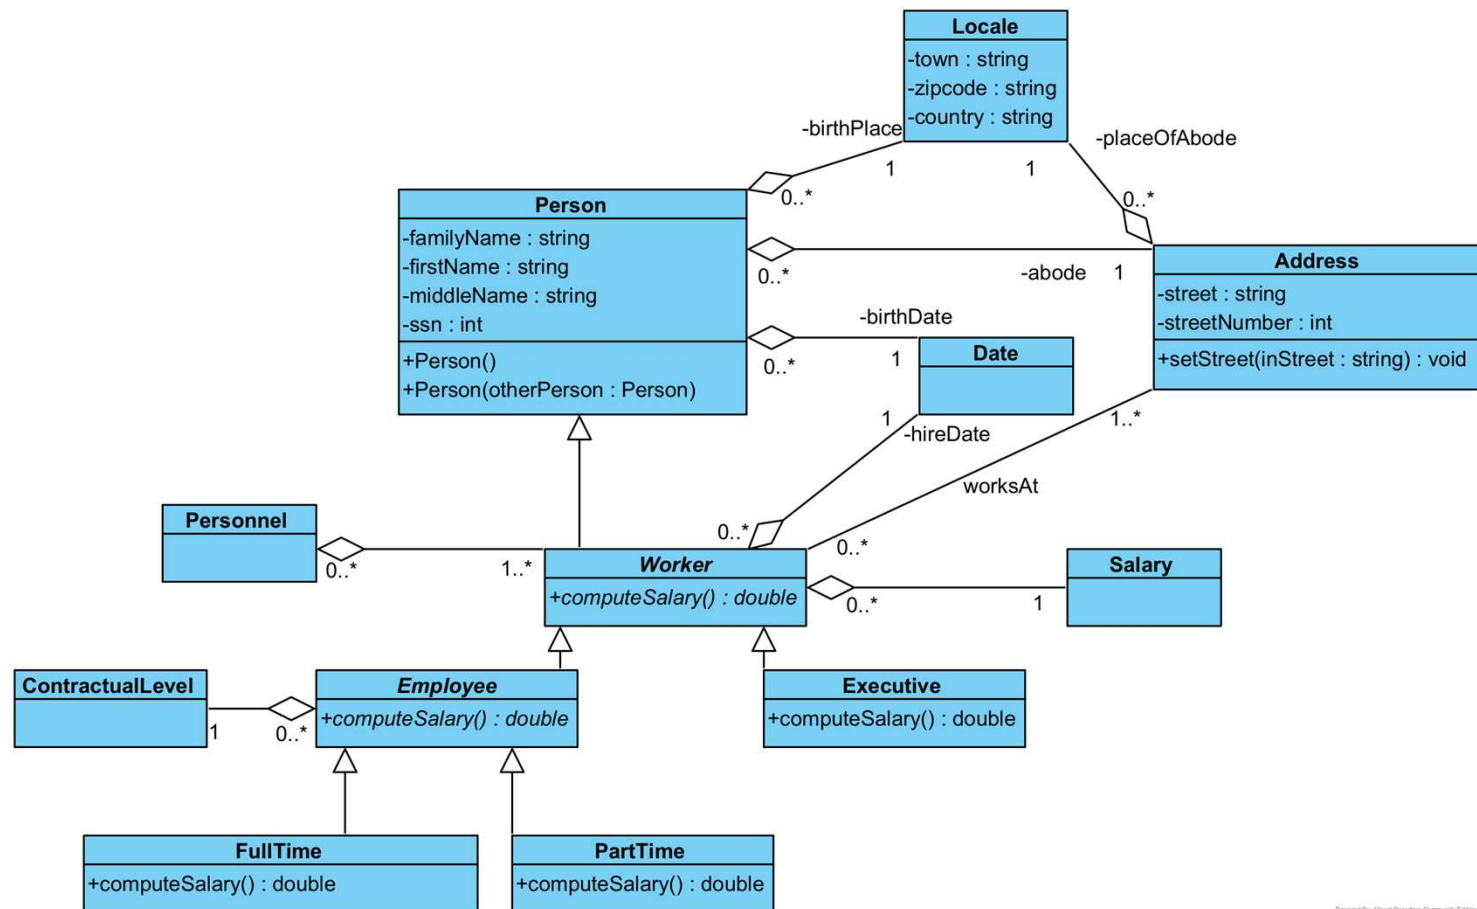

- Diagram with a few more members
